

7th  International Conference on
Cracking in Pavements

20-22 June 2012 Delft, The Netherlands

The conference will include, but is not limited to, the following topics:

- Fatigue cracking mechanisms
- Reflective cracking prediction and measurement
- Laboratory and field model validation
- Construction approaches related to crack development
- In-situ experimental studies
- Advanced design of anti-cracking options
- Accelerated pavement testing
- Computational modeling of pavement material response

Abstract submission

26 April 2011

Draft paper submission

30 Sept 2011

Final paper submission

29 Feb. 2012
